I am a recent University of Toronto graduate looking for work as a junior developer. I enjoy solving problems and writing useful, clean code. This will be my first software development job, and I'm excited.

University of Toronto

*Graduated **June 2021**.*

Bachelor of Science — Dual major in Computer Science and Psychology. My GPA was **3.18**.

- ✓ I participated in several group software development projects, including developing one real web application for a non-profit organization using Agile/Scrum methodologies.
- ✓ I implemented an extent-based file system in C.
- ✓ I made a clone of the game Mastermind using logic gates.

I just graduated, so I have no professional software development experience yet. Here are some other jobs I've worked:

A&W

*Vaughan, Ontario from **May 2019** ⟼ **January 2020***

Fast Food Worker

I worked under pressure in the kitchen and at the cashier in one of the busiest locations in the country (right outside of Canada's Wonderland).

Red Deer Regional Catholic Schools

*Red Deer, Alberta, during **Summer 2015***

IT Department

A summer job where I went with a team from school to school, servicing the school's computers.

Red Deer Regional Hospital Centre

*Red Deer, Alberta, from **September 2010** ⟼ **April 2014***

Renal Dialysis and Emergency Room Volunteer

In teams, we were in charge of tasks like assisting the patients and nurses, organizing, cleaning, and bringing meals to patients.

Software Skills

- ⊘ **Elixir/Phoenix (e.g. my website)**
- ⊘ **Python**
- ⊘ **C**
- ⊘ **Databases/SQL**
- ⊘ **HTML/CSS/Javascript, including tailwindcss**
- ⊘ **Unix/bash/shell**
- ⊘ **Git/version control**
- ⊘ **Unit testing and test-driven development**

Soft Skills

Self-awareness — I'm easy to work with and I'm a team player.

Fast learning — I'm a quick study. I am quick to admit what I don't know, and not afraid to ask questions when necessary.

Communication — I'm an efficient communicator and a good listener. I practice my communication skills on my blog.
